

Sports-Cote™ Pro PU Cross-section

SITE APPLIED CUSHIONED MULTI-PURPOSE SPORTS SURFACE

Sports-Cote™ Pro PU a two-pack polyurethane adhesive, a prefabricated rubber mat, a two-pack polyurethane pore filler, a 2mm self-levelling polyurethane wear layer and a single pack, water-based, low odour polyurethane top coat.

Sports-Cote™ Pro PU remains point elastic due to the resilient nature of the prefabricated rubber mat together with the polyurethane wear layer and top coat.

Sports-Cote™ Pro PU utilises materials that are environmentally friendly, including recycled rubber for the prefabricated mat and solvent-free and water-based polyurethane technology.

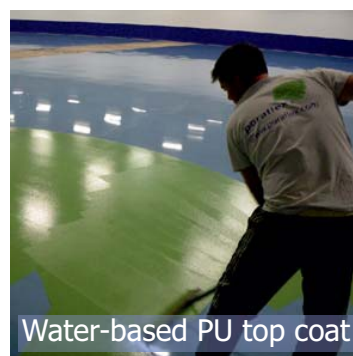

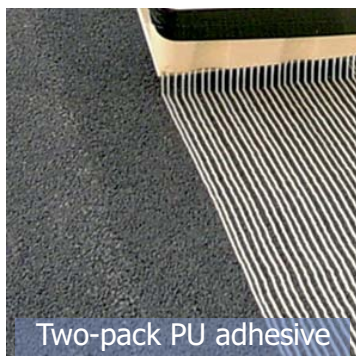

- Cushioned surface
- Very resilient and durable
- Seamless surface
- Water-based polyurethane
- Increased Chemical Resistance
- Bright colours
- Easy to clean

Sports-Cote™ Pro PU can be used for a number of sports and activities including badminton, tennis, netball, 5-a-side football, basketball, gymnastics, training, dance and aerobics.

The prefabricated rubber mat is manufactured under factory conditions and this - together with the very resilient and durable self-levelling polyurethane wear layer and water-based top coat - means that **Sports-Cote™ Pro PU** has an extended useful life. Furthermore, the low maintenance demand includes regular sweeping and periodic wet cleaning only.

No polishing or buffing is required. Indeed, re-finishing with a fresh top coat and wear layer will only be necessary after several years of usage. The prefabricated rubber mat can therefore be reused indefinitely.

Sports-Cote™ Pro PU surface installation sequence.
