

Polyspray

Single Pack Polyurethane Coating for Polymeric Surfaces

Sports-Cote Polyspray

Single Pack Polyurethane Coating for "Polymeric" Surfaces

Sports-Cote Polyspray is a single pack polyurethane coating designed specifically for application to "polymeric" playing surfaces.

Sports-Cote Polyspray is formulated using flexible and highly durable polyurethane technology. This provides optimum longevity when applied to "polymeric" tennis and netball courts, hockey pitches, five-a-side soccer pitches and Multi-Use Games Areas (MUGA's).

Sports-Cote Polyspray is readily applied by airless spray and is available in a range of colours.

Special Properties

-  Airless spray application for even and economic coating
-  Quick cure formulation to reduce facility downtime
-  Abrasion resistant for high durability and long useful life
-  Deep colours for an aesthetically pleasing surface
-  Resistant to the growth of fungi and algae
-  Very good chemical resistance - withstands degradation by common pollutants
-  Slip resistant - meets the dry and wet standards of the ITF and AENA
-  Unaffected by common cleaning agents - no deterioration of surface during maintenance

It should be noted that, in common with other aromatic-based polymers of this type, some fading due to the action of light will occur over time.

Uses

Sports-Cote Polyspray protects and enhances the appearance of "polymeric" playing surfaces whilst imparting the slip resistance characteristics that comply with the requirements of the ITF and AENA.
