HIGH PERFORMANCE IMPERMEABLE CUSHIONED ACRYLIC SURFACE

The **Sports-Cote™ Pro Elite** system comprises a high quality prefabricated 6mm rubber mat and specially formulated acrylic coatings resulting in an extremely durable impervious surface offering maximum comfort and consistent ball bounce.

As well as having excellent durability the cushioning effect will remain constant throughout seasonal temperature variations and over many years of use.

The uniform thickness of the mat ensures true ball bounce on all areas of the court.

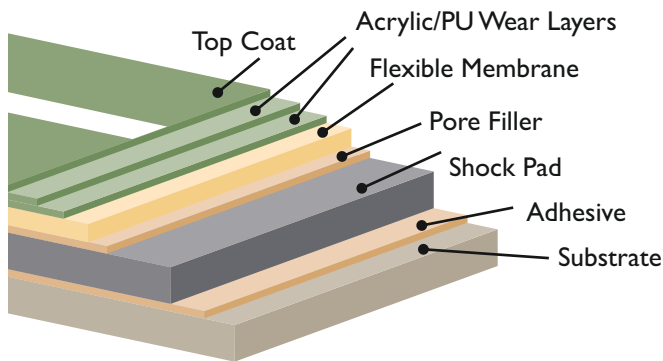

The coatings can be adjusted to meet the slip resistance requirements for other sports such as netball, basketball and five-a-side. This makes it the ideal surface choice for Multi Use Games Areas (**MUGAs**).

Sports-Cote™ Pro Elite is suitable for use both indoors and outside.

Pro Elite

The cross section shows the key components in the **Sports-Cote™ Pro Elite** surface system.

The substrate is usually a high density macadam or concrete base with minimum thickness as laid down by the SAPCA Code of Practice for the Construction and Maintenance of Tennis Courts.

The recycled rubber mat is then adhered to the substrate using a specially formulated solvent free adhesive.

A two pack polyurethane pore filler is applied to the rubber mat, giving a smooth surface for the system's upper layers. To create a totally seamless and resilient system, this is followed by the application of a two pack polyurethane flexible membrane. Two wear layers of highly durable acrylic paint are then applied, together with a top coat that imparts the required colour and slip resistance to the surface.

ITF Classification

All materials used in the formulation and installation of these products are environmentally friendly by utilising recycled rubber for the cushion layer together with solvent free adhesives and water-based polymer coatings.
